Motivated and driven B.Tech student pursuing a degree in [computer Engineering] at Marwadi University. Passionate about technology and eager to contribute to innovative projects. Skilled in C language, Java, Advance Java, HTML, CSS, javascript, SQL. Strong public speaking abilities and a knack for effectively conveying complex concepts. Constantly seeking opportunities to learn and grow.

EDUCATION

B-TECH Computer Engineering
Marwadi university

2022-Present
Current CPI - 8.29

PROJECT

E-Commerce Wesite

- I designed and coded a responsive e-commerce website akin to Flipkart, using HTML, CSS, JavaScript, and Bootstrap. This project deepened my understanding of web development and cultivated essential skills in front-end technologies and responsive design.

Travelling Desktop Application

."I designed and developed a travel and tourism desktop application using the Swing framework and MySQL database. This project greatly expanded my proficiency in both MySQL database management and Swing GUI development. Through its implementation, I acquired in-depth knowledge of SQL and database design. The application's intuitive features enhanced user experience, solidifying my skills in creating dynamic and user-centric desktop applications. This project underscores my commitment to continuous improvement and my dedication to delivering high-quality software solutions
